

# Introduction to Excel for Data Analytics

# Learning Outcomes

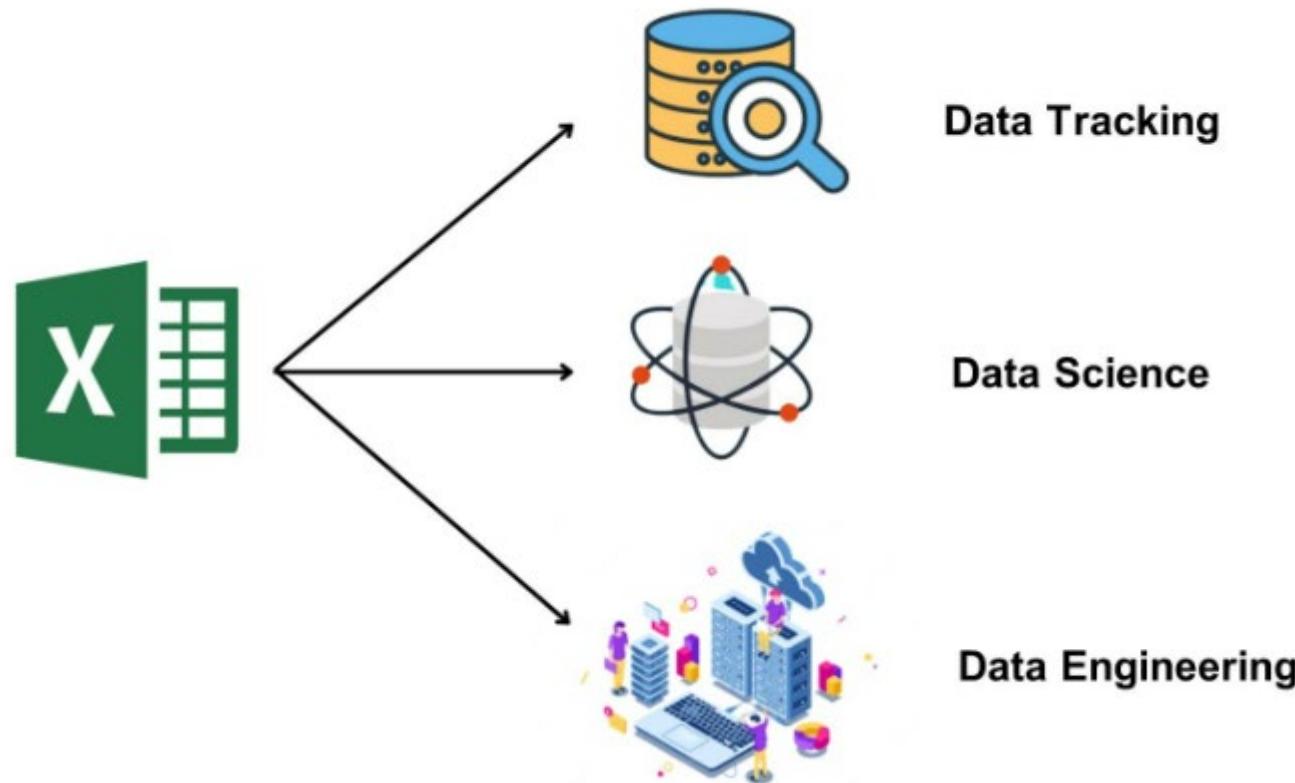

---

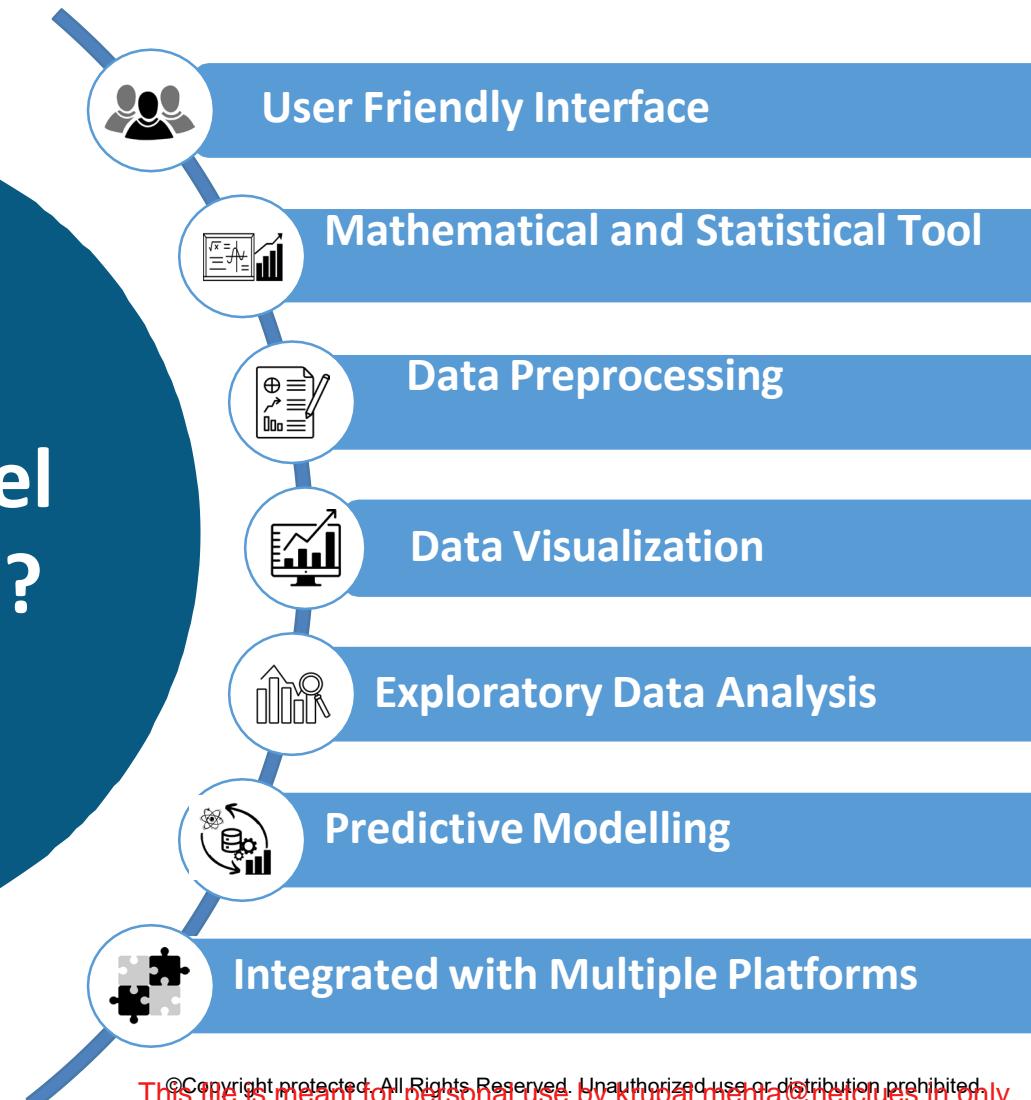

By the end of this section, you will be able to:

- Navigate the Excel Interface and be comfortable with using the tool
- Use excel for a variety of analytics work like Exploratory Data Analysis and Statistical Inference
- Work on Mathematical, Logical, Text, Statistical, Date Operations
- Join diverse datasets using Lookups
- Understand the different types of Errors in Excel and know how to deal with them

# Introduction to Excel

## Explore the Interface

You will be able to navigate through the features available in Excel

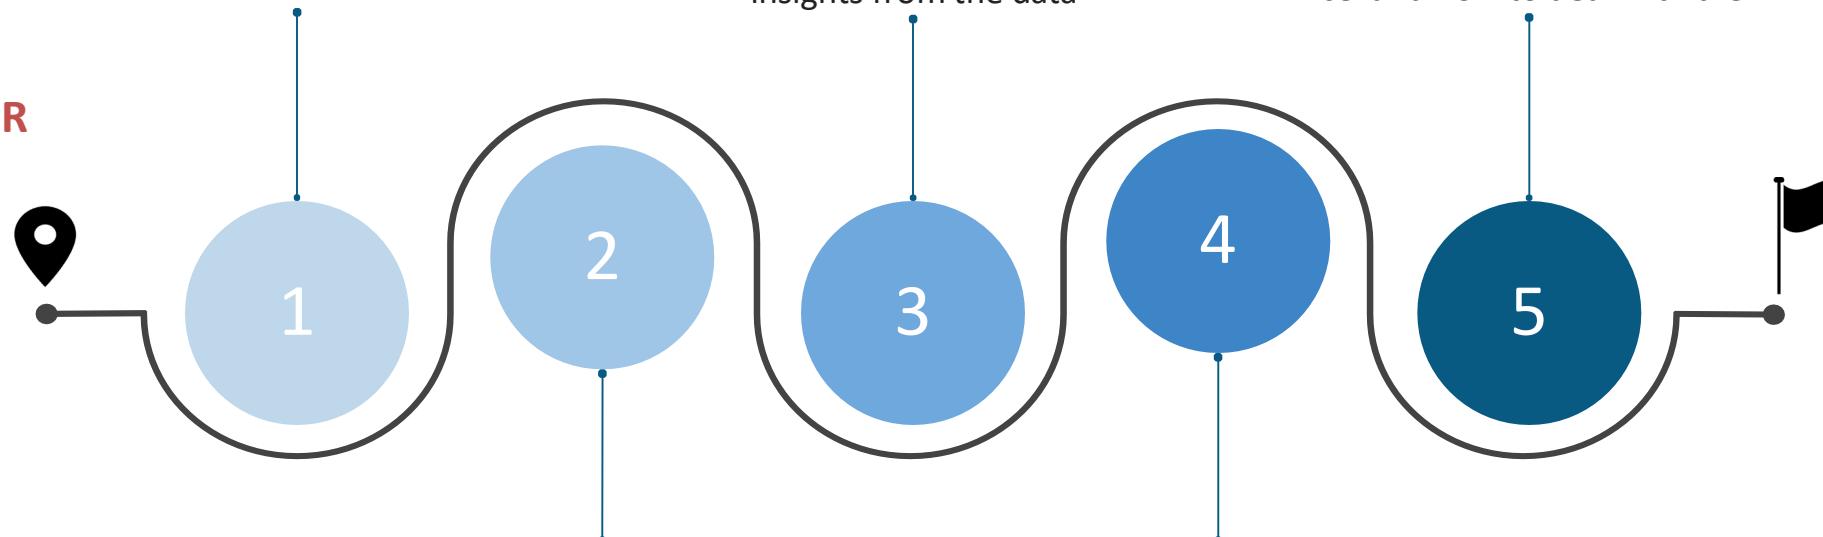

## Pivot Data

You will be able to use the PIVOT function to draw quick findings & insights from the data

## Information & Errors

You will be able to flag different types of value and understand why error occur in Excel and how to deal with them

**BEGINNER**

## Basic Operations

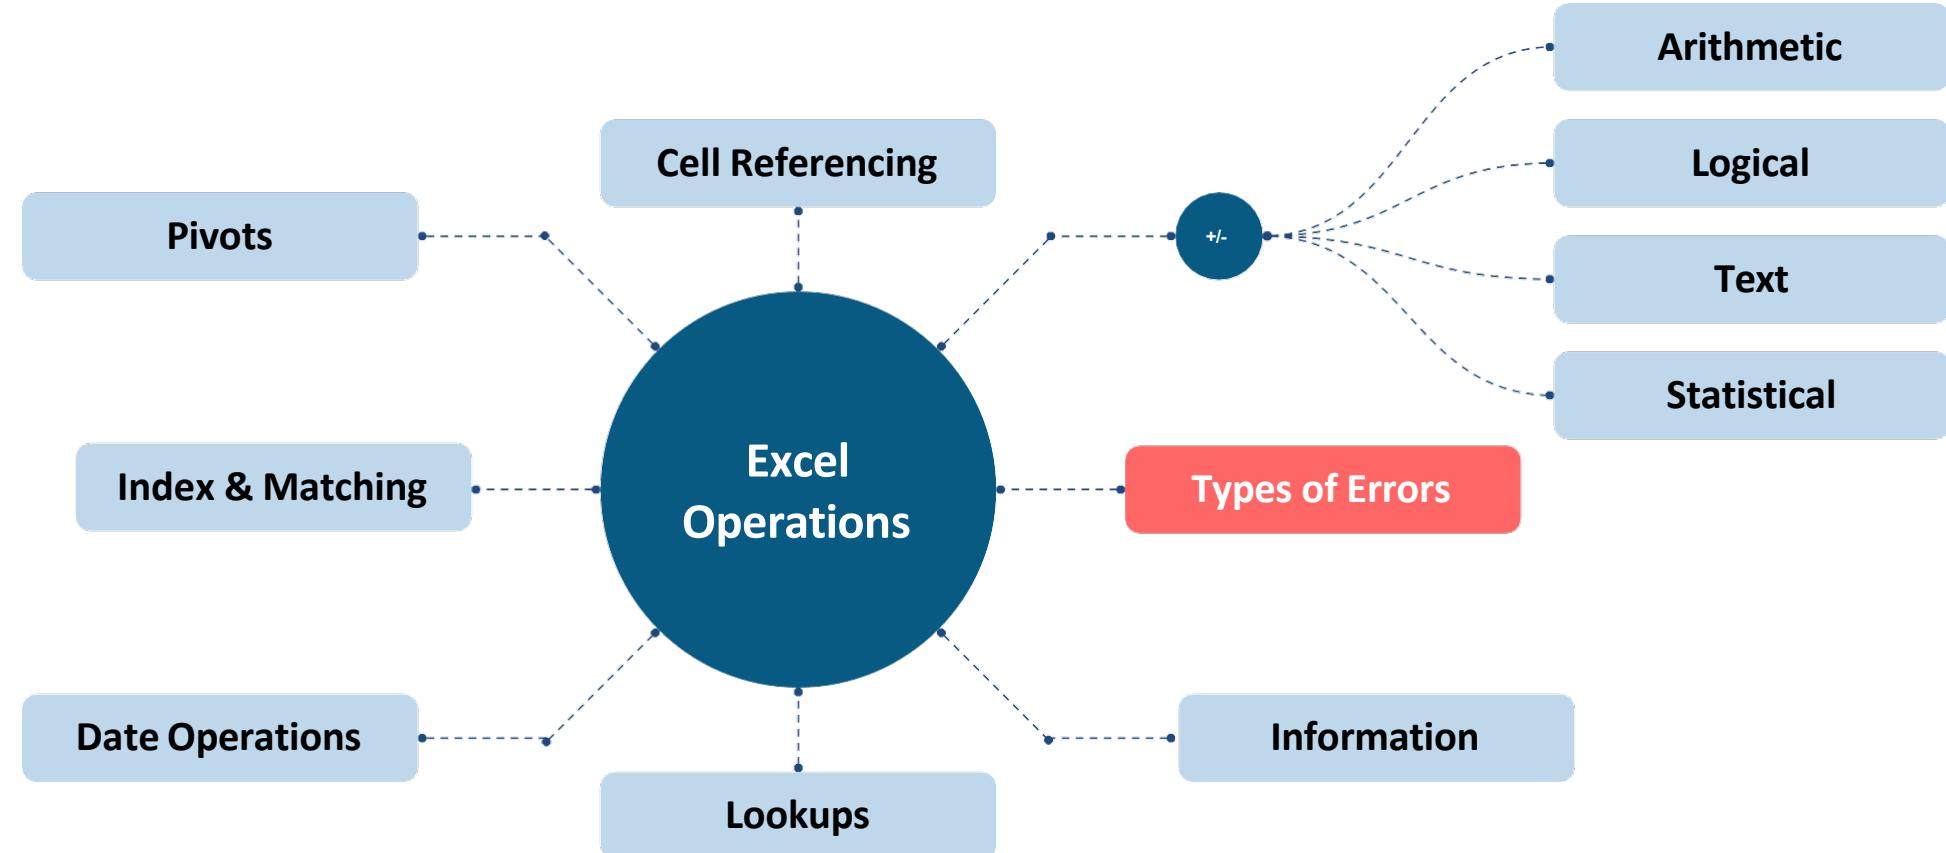

You will be able to perform Arithmetic and Logical operations on data

## Data Manipulation

You will be able to perform Text, Date and statistical operations on the data and use Match and Lookups to join datasets

**INTERMEDIATE**

# Excel Learning Map

# Power Ahead!
